

CHEMICAL COMPLIANCE – POISON CENTER NOTIFICATIONS

Every year, more than 600,000 calls are made to national poison centres across Europe following exposure to a chemical product. Half of these calls are related to children. For many years now, companies must declare the hazardous characteristics of products that they place on the EU market to each relevant national authority.

The European Chemicals Agency (ECHA) was recently appointed as the central body through which submissions can be made for dissemination to the national poison centres. The following submission deadlines now apply:

- 1st Jan 2020 – Consumer Products
- 1st Jan 2021 – Professional Products
- 1st Jan 2024 – Industrial Products

OUR SERVICES

Planning: Determining obligations, building a submission and cost road-map, assessing how portfolios and products are likely to change (as this will determine the type of maintenance required) and deciding who is best equipped to submit highly sensitive formulation information

Data Transfer: The relevant information may already exist in a consolidated location, for example, SDS authoring software, but evaluation and gap assessment will optimise the initial and ongoing data transfer process

UFI and File Preparation: A 16-digit alphanumeric unique formulation identifier (UFI) is required for submission and product packaging

Data Processing: Extensive reporting obligations may be reduced by grouping products, further applying submission rules protects formulation data

Submission: Submitting data via the single ECHA portal for the countries selected

Financial Administration: Managing all invoices transparently and seamlessly

Maintenance: Product and composition changes must be submitted which requires a carefully managed maintenance program

OUR EXPERTISE

- Landbell Group has built a compliance platform, element1™, to manage this program
- Landbell Group's team of chemists, toxicologists and safety data sheet professionals will lead and execute this program with clients, along with Landbell Group's dedicated data processing team

PROCEDURES

- Assessing clients' obligations and planning their program
- Data management
- Mapping technical and financial workflows

CUSTOMER BENEFITS

- Continued access to EU markets
- Reduced burden for importers
- Sensitive management of commercially important data
- A sustainable program which can be leveraged into other aspects of clients' businesses

LANDBELL GROUP

Landbell Group is an international supplier of service and consulting solutions for environmental and chemical compliance. With 25,000 customers in over 34 countries, we are present on four continents and employ over 270 people worldwide. Our aim is to reduce the complexity of extended producer responsibility legislation, as well as other product- and packaging-related requirements for producers and distributors. In everything we do, we seek to provide our customers with the most competitive solutions in terms of service quality, compliance and cost.

At Landbell Group, we prepare our clients for the uncertainties ahead. We help them unlock the value of the circular economy and strive to be their best partner on the journey to a more sustainable future. We do this by:

SIMPLIFYING

Our expertise and experience strip away complexity. We provide comprehensive and customer-focused solutions so our clients can focus on their core business.

BEING HOLISTIC

Our strong brands and comprehensive services combine to build integrated solutions. We think globally and act locally to build integrated solutions that tackle challenges effectively.

THINKING AHEAD

Our approach is innovative and entrepreneurial. With our pioneering heritage, we do not shy away from innovation and seek to challenge the status quo to drive change.

Landbell Group offers products and services in four key areas: take-back, chemical compliance, consulting services and software. We provide our customers with the widest range of solutions, so that they can focus on their core business and make the most of their resources.

TAKE-BACK:

Our take-back solutions address the complex product and packaging waste regulations faced by manufacturers and distributors internationally.

Worldwide, Landbell Group operates 35 take-back schemes and offers reliable, multinational services to all customers.

CONSULTING:

Our consulting services cover the whole range of chemical and environmental regulations, as well as other related legislation.

We support our clients' strategic goals by deriving the maximum value from sustainable business models linked to the circular economy.

CHEMICAL:

Our chemical regulatory solutions support company compliance, ensure market access and safeguard competitive advantage.

SOFTWARE:

Our software solutions reduce the growing financial and environmental demands on customers.

Efficient, secure and cost-effective, these solutions drive process efficiencies and factor in local regulations, language and currency to develop future-proof platforms.
