

CHEMICAL COMPLIANCE – GLOBAL HARMONISED SYSTEM FOR CLASSIFICATION AND LABELLING OF CHEMICALS (GHS)

GHS is a hazardous chemical classification system issued by the United Nations to harmonise existing systems around the world for communicating hazards, including labels and safety data sheets. Within the European Union, the Classification, Labelling and Packaging Regulation (CLP) aligns with GHS, as does OSHA HazCom 2012 in the United States. As more countries adopt GHS, more complexity is added to product compliance worldwide and it becomes critical to identify and understand obligations in different regions and how that impacts your supply chain. We help companies meet their GHS obligations at a national and worldwide level.

OUR SERVICES

Substances: Determine classifications, author and review Safety Data Sheets (SDS), and complete C+L notifications in EU

Mixtures: Determine classification and labelling for a mixture, and author and review SDS

Labels: Compile label content and review final label artwork

Maintenance: Build processes to keep your SDS up to date

Additional services: Complete inventory and supply chain reviews, WW product assessment, GHS personnel training, product stewardship, regulatory tracking and documentation portfolio management

OUR EXPERTISE

- International team with offices in Ireland, UK, Poland and USA
- Over 30+ years working in chemical regulatory affairs worldwide
- Experience working on complex, multinational programs for large international companies
- Project management and process focused

PROCEDURES

- Identification of obligations
- Assessment of compliance options
- Collection of documentation
- Establishing and carrying out work programme
- Comprehensive project management

CUSTOMER BENEFITS

- Sustainable compliance solutions
- Tailored and customer focused support
- Good working relationship with EU authorities
- Active engagement with product and hazard communication societies
- In-house developed specialist software

LANDBELL GROUP

Landbell Group is an international supplier of service and consulting solutions for environmental and chemical compliance. With 25,000 customers in over 34 countries, we are present on four continents and employ over 270 people worldwide. Our aim is to reduce the complexity of extended producer responsibility legislation, as well as other product- and packaging-related requirements for producers and distributors. In everything we do, we seek to provide our customers with the most competitive solutions in terms of service quality, compliance and cost.

At Landbell Group, we prepare our clients for the uncertainties ahead. We help them unlock the value of the circular economy and strive to be their best partner on the journey to a more sustainable future. We do this by:

SIMPLIFYING

Our expertise and experience strip away complexity. We provide comprehensive and customer-focused solutions so our clients can focus on their core business.

BEING HOLISTIC

Our strong brands and comprehensive services combine to build integrated solutions. We think globally and act locally to build integrated solutions that tackle challenges effectively.

THINKING AHEAD

Our approach is innovative and entrepreneurial. With our pioneering heritage, we do not shy away from innovation and seek to challenge the status quo to drive change.

Landbell Group offers products and services in four key areas: take-back, chemical compliance, consulting services and software. We provide our customers with the widest range of solutions, so that they can focus on their core business and make the most of their resources.

TAKE-BACK:

Our take-back solutions address the complex product and packaging waste regulations faced by manufacturers and distributors internationally.

Worldwide, Landbell Group operates 35 take-back schemes and offers reliable, multinational services to all customers.

CONSULTING:

Our consulting services cover the whole range of chemical and environmental regulations, as well as other related legislation.

We support our clients' strategic goals by deriving the maximum value from sustainable business models linked to the circular economy.

CHEMICAL:

Our chemical regulatory solutions support company compliance, ensure market access and safeguard competitive advantage.

SOFTWARE:

Our software solutions reduce the growing financial and environmental demands on customers.

Efficient, secure and cost-effective, these solutions drive process efficiencies and factor in local regulations, language and currency to develop future-proof platforms.
