

STREAMLINE CHEMICAL COMPLIANCE MANAGEMENT WITH ELEMENT1™

Manage all your chemical regulatory obligations in one place

REACH has become the global standard in chemical regulation, with REACH-like emerging in the UK, Turkey, South Korea, China and more. element1™ allows you to easily track your volumes, substances, and products across many jurisdictions.

Whether you are a pharmaceutical company ensuring your PPORDs and registrations are completed for proprietary intermediates approaching tonnage thresholds, or a producer of bespoke formulations looking to identify and remove hazardous substances from your products and processes, element1™ can support you.

Delivering effective product stewardship in the chemicals sector

Launched at the outset of REACH in the EU for Only Representative services, dossier authoring, HazCom, and project management services, element1™ has expanded to support tonnage management, supplier compliance, dossier updates, PCN and SCIP notifications, and similar duties in other jurisdictions.

element1™ enhances the delivery of:

- REACH and global REACH-like compliance services
- Global supply chain compliance
- Tracking Substances of Concern
- Meeting Classification & Labelling obligations

It is steadily expanding into the pharmaceutical industry, supporting the chemical compliance needs of six of the world's top 10 pharma companies.

Customer benefits

element1™ is highly configurable to suit the workflow and compliance needs of any organisation that manages a chemical portfolio, at either a substance or product level. Its modular design enables each organisation to define exactly the right toolset to meet their chemical stewardship and sustainability goals. Coupled with expert support, it is a one-stop-shop for executing chemical and product compliance programmes globally:

- One tool for chemical regulatory experts and their stakeholders to manage substances and projects
- Readily accessible information, priorities, costs, and projects for centralised control
- Capability to consume data from a wide variety of sources – including SAP
- Full support from Landbell Group's technical and software teams

Expertise

Landbell Group combines unique chemical regulatory knowledge – including experts from competent authorities, ECHA and industry – and over a decade of experience developing innovative software solutions. element1™ is supported by a highly skilled and experienced team.

If clients do not need all of the functionality of element1™, our modular approach allows Landbell Group to tailor the application to meet individual needs.

About us

Landbell Group is a leading global supplier of environmental and chemical compliance services, which helps companies to carry out their extended producer responsibility (EPR) obligations.

With customers in many countries, and colleagues based all over the world, we are a global platform for EPR.

Our unique approach

- An international team and network of compliance experts combine unrivalled operational expertise with consulting competence
