

# GLOBAL HARMONISED SYSTEM FOR CLASSIFICATION & LABELLING OF CHEMICALS (GHS)

## Safety data sheets (SDS)

Development of SDS and labels remains a core obligation for companies placing hazardous products onto the global marketplace. With our toxicological, industrial hygiene, and regulatory knowledge, and international partner network, we build and maintain hazard communication programmes for our clients and their specific product portfolios.

We deliver the following GHS services:

- Assessment of obligations and compliance planning
- Authoring and reviewing SDS
- Global labelling solutions – compiling label content and reviewing final artwork
- GHS consultancy, building processes to keep your SDS up to date and supply chains compliant

## Customer benefits

Our tailored and dedicated consultancy services:

- Create sustainable compliance strategies
- Proactively address supply chain risk
- Streamline market access for products
- Future-proof product portfolios against changes to the regulatory landscape
- Support product compliance and sustainability
- Provide active engagement with product and hazard communication societies
- Utilise specialist software which, among other features, enables SDS management, submission, and ongoing maintenance of notifications over time

## PCN and C&L notifications for hazardous mixtures and substances

We help companies determine and meet their EU notification obligations that are central to the safe management of chemical products: Poison Centre Notifications (PCN) and Classification & Labelling (C&L) notifications. With our bespoke software platform, element1™, we submit and enable ongoing maintenance of notifications over time.

We can help you solve notification duties for your product portfolio through the following services:

- Planning: determining obligations, building submission and cost roadmap
- Data transfer: consolidating, evaluating, and optimising data transfer process
- File preparation in harmonised format, data processing
- Submission to ECHA and national submission systems
- Consultancy: building processes to keep your notifications up to date

## Expertise

- Hazard communication and GHS services rely on in-depth toxicology, hazard, exposure, and risk assessment expertise in line with relevant government standards
- Project management, including financial planning
- Experience working on complex, multinational programs for large international companies

### About us

Landbell Group is a leading global supplier of environmental and chemical compliance services, which helps companies to carry out their extended producer responsibility (EPR) obligations.

With customers in many countries, and colleagues based all over the world, we are a global platform for EPR.

### Our unique approach

- An international team and network of compliance experts combine unrivalled operational expertise with consulting competence
- We run more approved EPR schemes than any other organisation globally
- We offer international support for EPR and chemical regulations, as well as software solutions for efficient compliance management processes
- Our global takeback programmes collect products anywhere
