

REGISTRATION, EVALUATION, AUTHORISATION & RESTRICTION OF CHEMICALS (REACH)

Registration & dossier management

H2 Compliance provides a full range of lead, member, and intermediate REACH registration services. Besides building and submitting substance dossiers, we help determine alternatives and costs, oversee testing, and provide full project management through to completion.

At present, the emphasis is on keeping registrations up to date with the requirements, evaluation decisions, and managing contractual engagement with co-registrants. Tonnage updates require regular attention, particularly after the Implementing Regulation imposed clear timelines.

Only Representative (OR) service

H2 Compliance supports numerous non-EU producers by acting as OR and taking over the duties of their importers. Since 2021, we provide an OR service into the UK, and through our partners, into Turkey and South Korea.

We provide a comprehensive service relying on deep knowledge and appreciation of complex supply chains, technical execution, financial management, and communication with clients and their customers.

Customer benefits

We offer:

- Market-leading experience in REACH and EU chemicals compliance
- Project management on time and within budget with a single point of contact for service delivery

- Services delivered over the secure, market-leading element1™ software platform
- Regulatory tracking to keep you informed of developments which may affect your business

Plus, tailored consultancy projects to:

- Assess and meet regulatory obligations
- Strengthen supply chains
- Assure continued market access
- Help manage regulatory changes and their potential impact on supply chains

Expertise

- **Inventory and strategy:** determining obligations and potential approaches to compliance (with financial planning)
- **Registration:** lead, member, and intermediate dossiers
- **Gap assessments:** reviewing current compliance programmes and resolving issues
- **Data-sharing:** managing all communication, contractual and financial aspects, so lead registrants can allow other parties to join a substance registration
- **Maintenance:** managing data, communicating with customers, and updating dossiers
- **Additional services:** staff training and awareness, substance tracking, and tracking of risk management measures that may apply to your portfolio
- **Multi-disciplinary team:** expertise in chemistry, toxicology, ecotoxicology, industrial hygiene, and supporting sciences within a vast array of industries

About us

Landbell Group is a leading global supplier of environmental and chemical compliance services, which helps companies to carry out their extended producer responsibility (EPR) obligations.

With customers in many countries, and colleagues based all over the world, we are a global platform for EPR.
