

SIMPLIFYING PRODUCER RESPONSIBILITY PROGRAMS IN ONTARIO, CANADA

We help companies meet their extended producer responsibilities for electrical and electronic equipment and batteries

The Electrical and Electronic Equipment (EEE) and Batteries Regulations are extended producer responsibility (EPR) laws in Ontario, Canada. These regulations oblige producers to take responsibility for collecting and reusing, refurbishing or recycling their products when consumers discard them.

If your company places Information Technology, Telecommunication, and Audio-Visual (ITT/AV) equipment and/or batteries onto the market in Ontario, then it can be a complex and time-consuming task to ensure you comply with the regulations.

Fulfillment of legal obligations

Improved reporting

Single point of contact

Simple and reliable compliance services

We will take on your company's legal obligations under the regulations:

- Arranging collection - and reusing, refurbishing or recycling your waste ITT/AV equipment and batteries
- Organising awareness-raising activities to promote your efforts to collect and reuse, refurbish or recycle waste ITT/AV equipment and batteries, and encourage public participation in these efforts
- Reporting your company's data submissions to the Resource Productivity and Recovery Authority (RPRA)

Want to do more than meet the requirements? Then, our experts can help you to close the loop, make the most of your resources, and increase the environmental and economic potential of your business.

Customer benefits

Our solutions allow producers to comply with the legislation fully and effectively. We provide practical support and total peace of mind with:

- Transparent and cost-effective compliance prices
- Regular access to advice and information – continuous support with your business' extended producer responsibilities
- Knowledge that your waste is treated to the highest possible standards, and
- Assurance that your company always complies with the collection and recovery targets set out by the Regulations

Expertise

Landbell Group operates more producer compliance schemes than any other company globally and has collected and treated over 4 million tonnes of waste EEE and over 100 thousand tonnes of waste batteries.

We have multilingual compliance teams with in-depth knowledge of the legislation, as well as experienced procurement teams regularly benchmarking suppliers for the best prices and treatment quality.

Our operations team, and multinational network of licensed waste carriers and treatment operators, can assist at every stage in the recovery of waste EEE and batteries.

Our own quality teams develop and implement industry-leading auditing and quality standards.
